

TOS 2022 Physiology of the Weight Reduced State: From Mechanisms to Clinical Application

Continuing Medical Education Information for Learners

Credit for this course may not exceed 3.75 credits when both the blended and enduring material activity format credits are combined.

Blended Course Accreditation and Credit for Physicians

The Obesity Society is accredited by the Accreditation Council for Continuing Medical Education (ACCME) to provide continuing medical education for physicians.

The Obesity Society designates this blended learning format activity for a maximum of 3.75 *AMA PRA Category 1 Credits™*. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

On-Demand Course Accreditation and Credit for Physicians

The Obesity Society is accredited by the Accreditation Council for Continuing Medical Education (ACCME) to provide continuing medical education for physicians.

The Obesity Society designates enduring material for a maximum of 3.75 *AMA PRA Category 1 Credits™*. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

Important Dates for On-Demand Course (Enduring Material)

Date of Release: January 4, 2023

Date of Termination: December 31, 2025

Learning Objectives

1. Review the physiological mechanisms that oppose weight loss maintenance
2. Identify important pathways in the gut-brain axis involved in promoting weight regain
3. Describe the changes in energy expenditure in the post weight loss setting
4. Implement clinical treatment recommendations to help patients maintain weight loss over the long-term

Commercial Support

No commercial support was received for this activity.

Faculty and Planning Committee Disclosure Information

The Obesity Society adheres to the ACCME's Standards for Integrity and Independence in Accredited Continuing Education. Any individuals in a position to control the content of a CE activity, including faculty, planners, reviewers or others are required to disclose all relevant financial relationships with ineligible entities¹ (commercial interests). All relevant conflicts of interest have been mitigated prior to the commencement of the activity.

The Obesity Society asks all individuals involved in the development and presentation of Continuing Medical Education (CME) activities to disclose all relevant relationships with ineligible companies. This information is disclosed to CME activity participants. The Obesity Society has procedures to mitigate all conflicts of interest. In addition, faculty members are asked to disclose when any unapproved use of pharmaceuticals or devices is being discussed. TOS requires additional disclosures beyond the ACCME definition of an ineligible company. These include food, weight loss, and supplement industry disclosures. In the list below, the nature of the relationship and company are followed by the industry of that company.

¹ An ineligible company as defined by the ACCME is one that is not eligible for ACCME accreditation, in other words those whose primary business is producing, marketing, selling, re-selling, or distributing healthcare products used by or on patients. Examples of such organizations include: 1) Advertising, marketing, or communication firms whose clients are ineligible companies, 2) Bio-medical startups that have begun a governmental regulatory approval process, 3) Compounding pharmacies that manufacture proprietary compound, 4) Device manufacturers or distributors, 5) Diagnostic labs that sell proprietary products, 6) Growers, distributors, manufacturers or sellers of medical foods and dietary supplements, 7) Manufacturers of health-related wearable products, 8) Pharmaceutical companies or distributors, 9) Pharmacy benefit managers, 10) Reagent manufacturers or sellers. Speaker Disclosures:

Name of Presenter	Relevant Financial Relationships
Lee Kaplan, MD, PhD, FTOS	Consultant relationship with Altimmune, Amgen, Boehringer Ingelheim, Gilead Sciences, Lilly, Novo Nordisk, Pfizer, Rhythm Pharmaceuticals, Xeno Biosciences (All Pharmaceuticals). Consultant relationship with Johnson & Johnson, Gelesis, GI Windows, GI Dynamics (all Medical Device). Consultant relationship with Intellihealth and Optum (Both Weight Management).
Eric Ravussin, PhD	Researcher relationship with Eli Lilly (Pharmaceuticals); Novartis (Pharmaceuticals); and Sanofi-Avantis (Pharmaceuticals). Consultant relationship with Eli Lilly (Pharmaceuticals); Merck (Pharmaceuticals); Amway (Supplement); Kintai Therapeutics (Biomedical); YSOPIA (Biomedical).
Michael Rosenbaum, MD	Consultant relationship with ByHeart (Medical Food) and Scholar Rock (Pharmaceuticals)
Beverly Tchang, MD	Consulting Fee relationship with Novo Nordisk (Pharmaceuticals)

Planner Disclosures:

Name	Relevant Financial Relationships
Aaron Kelly, PhD, FTOS	Unpaid consultant speaker relationship with Novo Nordisk (Pharmaceuticals); Unpaid consultant relationship with Vivus (Pharmaceuticals); Unpaid consultant relationship with Eli Lilly (Pharmaceuticals); Unpaid consulting relationship with Boehringer Ingelheim (Pharmaceuticals); Donated drug/placebo for NIH funded clinical trial relationship with Vivus (Pharmaceuticals)

Reviewer Disclosures: No members of the TOS CME Oversight Committee, charged with the resolution of all relevant conflicts of interest, had any relevant financial relationships while serving on the committee.
